ASSEMBLY INSTRUCTIONS

GEO TILES

- 1 Map locations of tiles on wall using template if required
- 2 Identify and cut (using a craft knife and a rule) the tiles that will be installed on the edges of the wall.

- 5 Firmly burnish tiles with roller to ensure proper adhesion to wall

- 3 Remove tape backing and apply tiles to the wall
- 4 Install the first two bottom rows, piece-by-piece along the bottom line. Make sure to position the pieces very linear and accurate against each other. This is especially critical for triangular and parallelogram shapes, a smaller error in the bottom section will grow successively further up on the pattern

Thank you for your order!
